

Weighted GPA Calculator

Karina, Aanchal, Anny

Motivation & Objectives

- It is difficult to calculate semester/overall GPA by hand
- We will build a weighted GPA calculator that takes class name, semester taken, credit weight, and grade and calculate semester GPAs and the overall GPA
- Students also have the option to set a goal GPA and calculate how many credits & grades needed to reach a goal
- Ability to filter major and non-major GPA
- Scholarships & dean-list probability

High Level Design

Task Assignments

- Karina: Handle calculation, take data and calculate GPAs
- Anny: Handle UI (using QML), parse data into operable data structures
- Aanchal: Handle outputs, display GPAs and output in a readable fashion

Timeline & Deliverables

- Oct 31st: Gather data and complete **mockups of UI/calculations**
- Nov 8th: Run first prototype on localhost, using Figma for UI templates
- Nov 15th: Refine code and correct bugs, making sure GPA calculation/extra features works appropriately
- Nov 21st: Adding a **user log in page** to protect credentials and continue to fix bugs
- Thanksgiving break & afterwards: Prepare for **presentation**
